## Immuno-DMG™ Sparkling Drink Mix

- **A dietary supplement to support immune system function.\***
- An advanced nutritional supplement that combines 8 powerful nutrients including N,N-Dimethylglycine (DMG) and Larch Tree. It also includes a purified D-fraction from Maitake Mushroom and Beta 1,3 Glucans along with Vitamins C, E and Zinc.\*
- Designed specifically for anyone with a weakened immune system.\*

### About the Nutrients:

- **DMG**, according to numerous studies, can help maintain a strong immune system by supporting increased resistance to invading microorganisms and enhancing antibody and lymphocyte production.\*
- **Larch Tree (*Larix Occidentalis*)** is a well-researched source of Arabinogalactans, which support the immune system in its production of immune cells and limiting unhealthy cell replication.\*
- **Maitake mushroom** is a highly concentrated source of Beta-1,6-Glucans which research has found supports the body's first line of defense, including macrophages and natural killer cells.\*

Maitake D-Fraction® has been extensively researched, and is one of the most comprehensive immune support ingredients available.\* It is the only Maitake ingredient that has been approved by the FDA for conducting phase 2 clinical studies (IND #54,589).\*

- **Beta-1,3-Glucans** are shown to activate B-Cells and T-Cells.\* Although derived from yeast there are no yeast proteins in it. The Beta Glucans are made from the cell walls of baker's yeast, which is then purified, and free of allergenic material.
- **Astragalus** is a Chinese herb that has been extensively studied since the 1970's for its ability to support the immune system.\*
- **Vitamins C and E**  
Vitamin C is a powerful antioxidant that helps protect cells from oxidative stress. It also supports the production of antibodies, a major function of the immune system.  
Vitamin E is a powerful antioxidant that supports the immune system in its function to stimulate natural (NK) cells and B

cells by stimulating the production of natural (NK) killer cells and supports the production of B-cells which create antibodies.\*

- **Zinc** is essential for a healthy immune system. It is required for the development and activation of T-Lymphocytes, a kind of white blood cell that helps fight infection.\*

### Supplement Facts

**Serving Size: 1 Scoop (6 g)**

#### Amount Per Serving

Calories	20
Total Carbohydrates	5 g
Vitamin C (as Ascorbic Acid)	250 mg
Vitamin E (as d-alpha tocopheryl Succinate)	100 IU
Riboflavin	15 mg
Calcium	76 mg
Zinc (as Zn Oxide)	5 mg
Dimethylglycine HCl	300 mg
Maitake PD-Fraction® yielding D-Fraction®	17 mg 5 mg
Larch Tree ( <i>Larix occidentalis</i> ) Arabinogalactan Powder	227 mg
Beta 1,3 Glucan (from baker's yeast cell walls)	100 mg
Astragalus Root Powder	50 mg
Stevia Leaf Extract	100 mg

Other ingredients: maltodextrin, citric acid, potassium bicarbonate, orange powder, natural orange flavor, tricalcium phosphate, silica.

**Warning:** If you are pregnant or nursing, consult your health care practitioner before taking this or any nutritional product.

- **Caution:** Discontinue use two weeks prior to surgery.
- **Suggested Use:** As a dietary supplement, mix one (6g) scoop in 6-8 oz of water, once or twice daily. Up to 3 servings daily in divided doses can be taken when faster results are required.
