Lactobacillus Acidophilus

- **A dietary supplement to support proper balance of intestinal flora.***
- Lactobacillus acidophilus is a beneficial strain of bacteria often referred to as a healthy microorganism, gut flora and a probiotic. Probiotics help maintain a balance between healthy and potentially harmful micro-organisms. Many strains of bacteria have been used in probiotic supplements. The lactobacillus species is most prominent in the small intestine.
- **Digestion and the small intestine**
 - The most important part of digestion takes place in the small intestine. Nutrients such as vitamins, minerals, proteins, fats and carbohydrates are absorbed into the bloodstream where they then travel to all body cells. Lactobacillus acidophilus is a major beneficial strain of bacteria involved in digestion. When out of balance, digestive disturbance and gastro-intestinal imbalance may occur. One way of maintaining a balance between the beneficial and harmful bacteria in the gut is to consume a source of beneficial bacteria in the diet.
- **What can affect the balance between beneficial and harmful bacteria?**
 - Aging
 - Illness
 - Poor diet
 - Stress
 - Use of medications

- **Imbalance of beneficial and harmful bacteria may result in:**
 - Digestive discomfort*
 - Gastro-Intestinal imbalance*
 - Poor nutrient absorption*
 - Poor skin health*
 - Yeast overgrowth*
- **About Davinci's Flora™**
 - Contains 1.5 billion lactobacilli per capsule which is a higher amount than yogurt
 - Needs no refrigeration
 - For children and adults

Supplement Facts

Serving Size: 2 Capsules

Amount Per Serving

Lactobacillus acidophilus (1.5 billion CFU)	300 mg
--	--------

Other ingredients: cellulose, gelatin, maltodextrin, stearic acid.

- **Contains: Milk.**

Warning: If pregnant or nursing, consult your health care practitioner before taking this product.

- **Suggested Use:** As a dietary supplement, take 2 capsules between meals, once daily.

Sold Exclusively Through Retailers.

0300341.060 (60 Capsules)
