FOODSCIENCE® of Vermont

Unique C®

- **A dietary supplement to support immune system function and collagen health.***
- **Vitamin C:**
 - Helps maintain collagen*
 - Helps form red blood cells*
 - Provides antioxidant protection against free radicals*
 - Supports the immune system*
- **Unique C®** contains Vitamin C in a buffered Ascorbate form. Ascorbate is a Vitamin C molecule with a mineral ion. All Vitamin C must link up with a mineral before it can be absorbed into the blood stream. By supplying minerals along with Vitamin C, **Unique C®** supports the immediate assimilation of Vitamin C in the body.* Because **Unique C®** is in the Ascorbate form and the presence of minerals help to act as natural buffers, it helps prevent stomach irritation that is common in non-buffered formulas.*
- Vitamin C or Ascorbic Acid belongs to a class of vitamins which are termed water-soluble nutrients. It is not stored in the body and should be replenished throughout the day and evening for optimal health.* As a water soluble vitamin, the body is able to excrete any unneeded levels of Vitamin C, which allows for flexible dosing.*
- **Unique C®** contains Bioflavonoids, which increase the effectiveness of Vitamin C by 50%.* Calcium, Magnesium, Zinc, Manganese and Potassium are included in the **Unique C®** formulations. The diuretic effect accompanying higher intake of Vitamin C often depletes the body's store of vital minerals. **Unique C®** provides a bioavailable source of minerals.* Pectin has been shown to be beneficial in managing cholesterol levels within normal ranges.*
- **Unique C®** is available in two potencies and forms. The **Unique C® 500** is an easy to swallow vegetarian capsule, while **Unique C® 1000** is a convenient tablet.

Unique C® 500

Supplement Facts

Serving Size: 1 Capsule

Each serving contains:

Vitamin C	
(as Ascorbic Acid and mineral Ascorbates)	500 mg
Calcium (as Ca. Carbonate and Ca. Ascorbate)	45 mg
Magnesium (as Mg. Ascorbate)	20 mg
